

## About IEEE Global Communications Conference

IEEE Global Communications Conference (GLOBECOM) is one of the IEEE Communications Society's two flagship conferences dedicated to driving innovation in nearly every aspect of communications. Each year, more than 2,900 scientific researchers and their management submit proposals for program sessions to be held at the annual conference. After extensive peer review, the best of the proposals are selected for the conference program, which includes technical papers, tutorials, workshops and industry sessions designed specifically to advance technologies, systems and infrastructure that are continuing to reshape the world and provide all users with access to an unprecedented spectrum of high-speed, seamless and cost-effective global telecommunications services.

## Mission and Vision

In order to be successful professional, a person needs to have knowledge as well as experience and IEEE is working in that direction with a **vision** to provide that work experience to the present and the future generations.

Our **Mission** is to acquire, promote, develop and disseminate knowledge of engineering sciences and its application to improve the quality of life and, in particular, to equip present and future generation with skills and attitudes to attain competence as professional engineers, and to interact with industry and community for sustainable development of humankind.

### About IEEE

The IEEE (Institute of Electrical and Electronics Engineers, Inc.) is the world's largest technical professional organization dedicated to advancing technology for the benefit of humanity. Through its more than 400,000 members in 150 countries, the organization is a leading authority on a wide variety of areas ranging from aerospace systems, computers and telecommunications to biomedical engineering, electric power and consumer electronics. IEEE and its members inspire a global community to innovate for a better tomorrow through its highly-cited publications, conferences, technology standards, and professional and educational activities. IEEE is the trusted "voice" for engineering, computing and technology information around the globe. Dedicated to the advancement of technology, the IEEE publishes 30 percent of the world's literature in the electrical and electronics engineering and computer science fields, and has developed nearly 900 active industry standards. The organization annually sponsors more than 850 conferences worldwide.

### About IEEE Global Communications Conference

## **IEEE Strategic Plans**

IEEE mainly follow 4 stratergetic plans including collecting and giving an opportunity to people of different diversity in order to increase the flexibility, knowledge, ideation process of the members, next we provide a forum to people for open discussions, debates and presentation of new ideas. We discuss and work on the most difficult and challenging questions globally and most importantly provides with new ideas and recommendations for public and entrepreneurs.
